U.S. TO SPEND 12 MILLION  
ON ALASKAN DEFENCE

WASHINGTON—The United States navy awarded a contract estimated at \$12,000,000 for the construction of air bases at Kodiak Island and Sitka, Alaska.

Construction of the air bases is part of the government's plan for the strengthening of national defense. Officials say that planes operating from the Alaskan points would be able to help detect and ward off any advance upon the United States via the Alaskan peninsula.

## SURFED ROAD TO BORDER

From Edmonton to the International Boundary, a distance of 371 miles, a bituminous paving has been laid. It has not been completed, the last stretch having been completed a few days ago between Olds and Lethbridge.

Government officials also have announced that the "seal coat" or second course of bituminous surface has been laid from Okotoks to Waterloo. Lethbridge is a distance of approximately 135 miles.

On the Jasper highway "blotterizing" or first coat bituminous surface has been applied for a distance of 100 miles, from Edmonton to Stony Plain.

## WEDDINGS

GIBSON—SNELL

On Friday evening, September 1, a quiet wedding took place at the home of Rev. Mr. J. C. Gibson, Minister of The First Methodist Church in Lethbridge, when Ella Christina, elder daughter of Mr. and Mrs. J. M. Snell of Carbon, became the bride of Mr. William A. Gibson, son of Mr. and Mrs. W. J. Gibson.

The bride was attended by Miss Edna Gibson, sister of the groom, and Mr. and Mrs. Gibson was the groomsmen.

The bride chose for the occasion a pretty empire blue gown with matching accessories.

After the ceremony a luncheon was held for the immediate relatives and close friends.

Mr. and Mrs. Gibson will reside on their farm north of Carbon.

Sales of new motor vehicles in Canada in July amounted to 7,877 units valued at \$8,487,187, compared with 6,944 units worth \$8,000,000 in June.

Not more than 30 crop failure certificates will be necessary this year in Prince Albert judicial district, it is estimated. This compares with 322 in 1934 in 1935.

A man who admitted tearing a tinted photograph of Adolf Hitler from a friend's wall was acquitted in city court at Indianapolis of a charge of violating treason laws.

A subversive of the U.S.S. Annapolis which was to take eight officers, 90 cadets and 20 enlisted men to Halifax was canceled with no reason given.

Judge D. C. Campbell, 58, former judge of Manitoba's western judicial district, died recently. He was a resident of Brandon for many years.

Production of the aircraft industry in Canada in 1938 amounted in value to \$6,927,105, a sharp increase compared with \$1,730,724 the previous year, the Dominion bureau of statistics reported.

At 10:30 a.m. on June 6, third son of the first Earl of Oxford and Asquith, is dead. In 1918 he became controller of the French trench department. Later he went into business and held numerous posts.

Imports of Canada's agricultural products to the United Kingdom have increased more than 140 per cent in the last 12 months, Fredric Hulot, chief Canadian trade commissioner in Great Britain, said in London.

## Gives Perfect Service

New York Has Single System To Answer Every Call

A woman gropes through smoke to the telephone, lifts the receiver and screams "Fire!" into the mouthpiece. If she behaves the way 50 per cent of her sisters and brothers behave in the same emergency, she will then ask for fire headquarters. When the connection is made she will scream "My house is on fire!" and hang up.

No address is given, no vital information, continues the New York World-Telegram. She does not even say what borough she lives in. Fear and panic, not direction, are the chief ingredients in her panic. And the fire department has to solve the all-important mystery of where the fire is without her help.

Eight or twenty seconds after a screech, two engine companies, two ladder trucks, and a battalion chief are rolling through the streets, heading directly for her home, the mystery solved.

How did it solve? By a system worked out by the unsung technicians of the Fire Alarm Telegraph Bureau and the New York Telephone.

Years ago, when the telephone first became a factor in daily life, the fire department alarm bureau went to the telephone company with the suggestion that all fire calls immediately traced. There is no more mechanical, a trained response to a situation that works like this.

The woman asks for a dial or a push button. In the central exchange the supervisor automatically plugs in and listens. If the location is given she loses interest. But if the woman fails to say where the fire is, the supervisor asks for the address of the telephone on which the call was made and telephones that information to the telegraph bureau of the fire department. In practice the whole maneuver takes less time than the telling.

## Responsible Request

The heads of a big manufacturing plant had that notice posted at the beginning of the summer.

All requests for leave in absence on account of toothache, severe colds, and minor physical ailments, and on account of church picnics, parties and funerals, and the like, must be handed to the foreman in charge of your department before 10 a.m. on the morning of the game.

News that Canada's exports to the United States during the last three months were double those for a similar period last year show how prosperity could easily come back to this country. It is the result for the influence of turbulent Europe.

Canada, during 1937, produced 34 times as many lambs and 22 per cent of the United States' total production of 4,943,000 tons.

The gingerbread pains of Egypt has seed surrounded by gold that tastes like gingerbread.

**British Woman Spy Got Valuable Information About Germany**

Behind many executions carried out at the dreaded Moabit prison, Berlin, lies the story of a beautiful woman who "do her bit", and for the sake of her country, gave up romance and a life of luxury and safety.

Her career is an epic of the Secret Service, for, despite the efforts of Gestapo agents who were sent to obtain some of the most vital information concerning German rearmament that has passed into British hands.

She was only caught at last through a radio broadcast that was put to newspaper offices and the police telephone for the truth?

The radio is a great instrument for public opinion, and enlightened people, when properly used, have the men and women who use it to-day just as human and just as fallible as are the men and women who get their news from the press.

And, what is more, they are not subject to that strict accountability for accuracy, which the printed record of what appears in a newspaper holds over the heads of those responsible for it. —Detroit Free Press.

## Have To Be Accurate

**Newspapers Obliged To Be Careful About What They Print**

A number of newspaper stories, which Fortune Magazine reported, show that a considerable number of people think that the news they get by radio is more accurate than the news they get in their papers.

Well, well! Where do the radio announcers get their more accurate news?

They get it from the newspapers or from the same sources from which the newspapers get their news.

And when Orson Welles turned his radio drama into a real invasion from Mars, was it not a broadcast that was put to newspaper offices and the police telephone for the truth?

## Has Thrilling Job

**Canadian Girl Woman Sleepyjack Is Paid For Her Work**

Mrs. Charles Miner, Agincourt, Ont., a petite, comely blonde, gave up the uneventful life of a housewife a year ago to become Canada's only woman sleepypacker.

Since then she has painted a high-steppin' flag pole and water towers in the Dominion, and has been to the Orient.

There is no extraord in such cases, but the Nazi rulers of the city found a way of getting over that difficulty.

She and eight men said to have been acting for her were seized during the night and smuggled into East Prussia, afterwards being transported to Berlin.

The Gestapo got on her trail through the perjury of a German posing as a French. His summons were read to her and she signed her with the suggestion that she should co-operate with him in the Service.

She fell into the trap, accepted the offer, and was left at liberty until her associates in the city were discovered.

## The Money Maker

**Great Composer Thought He Could Learn From Some Writer**

It is said that George Gershwin once went to a theater to learn from competition from the great Russian composer, Igor Stravinsky, who had won the Pulitzer Prize for his "Rite of Spring" at the New York World Street Journal.

When they came to decide on the fee, Stravinsky asked to know how much his yearly income was.

"About \$250,000," was the reply. "My boy," said Stravinsky, "you should be giving less money to me."

## SELECTED RECIPES

**FRUITED STUFFING**

2 cups crushed Shredded Wheat

1/2 cup shortening or bacon drippings

1 1/2 cups onions minced

1/2 cup shredded raw carrot

1/2 cup raw celery

1/2 teaspoon paprika

1/2 cup salted or pickled cloves

1/2 cup seedless raisins (optional)

1 tablespoon finely minced parsley

1/2 cup dried apricots (optional)

Creamed onions and Wheat窑窑

Make fat hot in frying pan; add onion, carrot and celery and cook until tender. Add salt, paprika, cloves, onions and raisins. Add dried fruit if desired and add the beaten egg. Fill lightly into cavity of ham. This stuffing is especially suitable for pork, goose, veal or lamb.

**BUTTERFLY BISCUITS**

2 cups sifted Swan Down Cake Flour

2 teaspoons Calumet Baking Powder

1/4 teaspoon salt

4 tablespoons butter or other fat

1/2 cup buttermilk or sour milk

Sift flour once, measure, add salt and creamed onions and mix well.

Cut in shortening. Add milk all at once and stir carefully until mixture forms a soft dough.

Turn out on slightly floured board and knead 30 seconds. Roll 1/2 inch thick and cut with 2 1/2 inch biscuit cutter, place on ungreased baking sheet. Bake in oven at 450° for 12 to 15 minutes. Makes 12 biscuits.

## EXPECT BRITAIN AND FRANCE WILL COMMAND SEA

London.—The best comfort to most Britons in the present crisis is that the navy, challenged but once since World War I, is still intact.

As the ships take up war dispositions—the Mediterranean fleet combined with the French fleet in one, and the Home fleet “some where in the North Sea”—the observers of neutral powers can see but one slim chance for the navies of the Berlin-Rome axis.

The chance is an effective surprise movement which would destroy the battleships and heavy cruisers, form a fleet’s main striking weapon. Such an attack, if successful, would revolutionize naval warfare.

Barring the possibility of such an attack being carried out successfully, experts believe Britain and France, who now have virtual command of the seas almost from the start of the war.

To those same observers the British and French strategy would be almost identical with that developed from the British “Jutland”—that is, after the battle of Jutland—on to the end of last year. This includes:

1. Immediate blockade of Germany and in this case Italy—ports and coast.

2. Provision of convoy for transport of men and supplies.

3. Patrol of French and British trade routes to prevent depredations of raiders and saboteurs.

4. Support of land operations by bombardment.

5. Bombardment of vulnerable ports and coasts.

The British-French fleet would have to be on constant guard against a German-Italian smash at the blockade. Nine out of ten men tell you it would be folly for any admiral to risk his fleet in the French navies in open battle but the chance is there, although it is more remote than in 1914.

British tonnage numbers and tonnage the axis offers small challenge to the British and French. On completion of their current construction programs, Britain and France will command 38 capital ships, 160 cruisers, 140 destroyers, 220 torpedo boats, and torpedo boats and 165 submarines.

Axial figures are much less. They have 20 capital ships, 42 cruisers, two aircraft carriers, 190 destroyers and torpedo boats and 175 submarines.

Submarines would be the axis’ chief threat against enemy shipping in time of war. The British and French believe they have found the answer in new detection devices, more powerful depth charges and more effective armament for both merchantmen and men of war.

## Would Register Transients

Want Government To Proclaim National Registration Week.

Toronto.—E. A. Horton, Ontario deputy minister of municipal affairs and construction, said the Ontario government had asked the Dominion government to proclaim a “National Registration Week” to determine the number of unemployed transients and other recipients of relief.

Mr. Horton made the announcement during an address at the Ontario Municipal Association convention. He said that if the plan were adopted the date of signing the registration form would rest with the unemployed man and he would work for the form when asking for work or relief.

## Will All Be Freed

But Communists Still In German Camps Get Special Privileges

Warsaw.—The newspaper Kurier Warszawski (independent) reported from Berlin that 12,000 Communists remaining in German concentration camps have been given the status of “privileged persons.”

It said that in order to reach the non-aggression accord with the Soviet Union Germany promised to free all Communists already in German concentration camps to the Dachau concentration camp to the Soviet Union. Kurier Warszawski added that others are to leave Germany.

## Forms New Government

### But Task Of Japanese General Is Difficult One

Tokyo.—General Nobuyuki Abe, a moderate called from three years’ a retirement began constructing a new government to which the Japanese dictated policy to which Japan signed after Germany concluded her non-aggression pact with Soviet Russia.

Emperor Hirohito called on the 64-year-old Abe to form a cabinet. Abe, with much difficulty, formed a cabinet replacing that of Baron Hachiro Hiranuma.

With Japan’s attention centering on the Soviet Union, the Japanese are at war against Manchukuo or North China. Abe faces a difficult task in keeping clear of international complications which might threaten the Japanese Empire.

At the same time Abe, former inspector general of military education and once acting war minister, faced the task of maintaining a ministry of war which is composed of extreme nationalists and liberals. The latter favor friendship with Great Britain and United States, a policy which would have virtual command of the seas almost from the start of the war.

### Signed Upon Defeating Dictators Says U.S. Rear Admiral

Boston.—Rear Admiral Yates Stirling, retired, told the national convention of the United States Veterans Foreign Wars, America’s security “dictators” are to be defeated when war starts, and the one way to do that will be to go into the war at first.”

General Stirling and France should be forced to fight against the aggressors of the dictators, we, the present recipients of this protection, have decided through neutrality laws that we are not to be given even the right to material which is allowed under the rules of international law, he said.

## New Wheat Crop

### The Protein Content Of 1938 Wheat Is Average Higher

Winnipeg.—Preliminary examinations of the new wheat crop indicate the protein content, index to baking quality, is averaging above the previous year’s yield, according to reports from the board of grain commissioners.

A preliminary report from the board of grain commissioners indicates the new wheat crop is 1.3 per cent higher than the average for last year from the same point.

Manitoba returned 616 samples

showing an average protein level of

14.9 per cent; Saskatchewan 205 and

Alberta 76 and 14.7 per cent.

Manitoba’s level is 7 per cent

higher than the corresponding values
